Challenges of Higher Education

Dr. S. K. Saikia

Principal

DHSK College, Dibrugarh

India has the 2nd largest higher education system after China. Higher education in India is likely to undergo more intensive changes in the immediate future. What would be the scenario of Higher education segment in 2025? This is a question worth pondering over. Rapid changes in global higher education is obviously going too. There are great challenges ahead. One of the major challenges is competing with global leaders in higher education. Another equally daunting challenge is regarding making higher education accessible and more open. On the one hand, there is the pressing need of enhancing the quality of higher education in India and also the need of setting it at par with global leading countries in this field. This will apparently entail adopting new techniques and methods in the higher education segment in India. In fact the stage is set ready to make inroads to a number of new techniques in the Indian higher education sector. ICT has already invaded the field since the approval of the landmark National Mission Education through ICT scheme. The mission has planned a variety of initiatives, aimed at developing and standardizing digital content for Indian Higher Education segment. The mission envisaged catering to the learning needs of 500 million people in the country. A number of currently trending new methods will soon be incorporated in the Indian higher education system- game based learning, flipped classroom, active learning classroom, MOOC, Collaborative Distance Learning, active learning forum, Learning Management System (LMS) etc. The stage is set for adoption of video lectures, text based-e-content, e-learning resources to embedded text, video and voice based educational resources. India has entered massification of Higher education in their century itself. In the field of higher education Massive Open Online Course (MOOC) will play a considerable role in the era of massification of Higher education. Khan Academy has already made a considerable progress in this regard. The Indian Government has also initiated course Shera, Swayam etc. The 3rd phase of Industrial Revolution has already made a huge impact on higher education by means of electronics, IT, Automated production etc. Now the stage is laid open for the 4th phase of Industrial Revolution (CYBER AGE) to have its sway over the higher education sector. Indian education system which is based on traditional methods of imparting education will definitely witness a huge overhaul and sea change in the new future. Colleges will have to adopt new techniques and methods of imparting higher education as a means of survival in the competitive global scenario of higher education.

From the IQAC desk

The IQAC (Internal Quality Assurance Cell) has been constituted in the Institute of Higher Learning (IHL) with the prime objectives of maintaining quality in Teaching-Learning and other components of the institute like colleges. Assessment and accreditation of an IHL is compulsory for grading.

In 2004, DHSK College was accredited by NAAC and was graded B++ which was valid for five years i.e. up to 2009. The 2nd cycle of accreditation is overdue to us. The college authority advised us to prepare the Self Study Report as early as possible. So, IQAC was constituted in our College in the year 2005. The present IQAC assume charge on September, 2015. We were to prepare annual reports of the College for 2013-14, 2014-15 and 2015-16. The first two annual reports were submitted to NAAC on August, 2016 and the third report submitted on December, 2016 for perusal. Our team with the support of the college authority, faculties, employees and students prepared the self study report (SSR) which was approved by the Governing Body of DHSK College on 8th Dec, 2016. After obtaining necessary permission from the college authority, the SSR was uploaded in the college web site on 12.12.2016 which is available for all. The Letter of Intent (LOI) was submitted to NAAC on 22nd December, 2016 which has been accepted on 04.01.2017.
