(BIANNUAL BULLETIN, JULY-DECEMBER, 2017)

## Principal's Desk-

## Future Education

**Dr. S. K. Saikia**  
Principal  
DHSK College, Dibrugarh

Change is inevitable and changes in education system is a reality that no one can escape. There is no doubt that future education will be full of new challenges and drastic changes. Eighty five percent of graduates in India are unemployed. This high percentage of unemployment is perhaps due to certain lacunae in the Indian education system which is said to be more theory based. There is an urgent need that the Indian education system takes a sharp turn towards practical based education. Future education system will incorporate in large measure personalized learning. Study tools capable of adapting to the capabilities of students will be evolved to aid students in the learning process. E-learning tools will facilitate opportunities for remote self-learning. E-learning tools will in fact make learning possible at different times and places. The future education will definitely be practical based and theoretical part will be accomplished by students outside classrooms. Education in the future will provide free choice to students. Students will be able to modify learning process with tools they feel necessary for them. Learning will be enhanced with suitable devices, different programs and techniques based on the preference of students. Future education will be equipped with blended learning, flipped classroom, BYOD (Bring Your Own Device) etc. Education in the future will become more intensively project based. Students will have to adopt to project based learning and working. Future education will also necessitate greater field experience on the part of students. Students' experience in the field or domain will become more emphatic within courses. Future educational courses will create more space for students to fulfil internships, mentoring projects and collaboration projects. Changes will also be reflected in the examination system. Coursework performances will assess students' capabilities at each step. It is likely that Question & Answer might become irrelevant. Innovative practices, methodology and disciplines will be the hallmark of education in the future. In this rapidly changing scenario students will have to devote themselves wholeheartedly to build their successful educational career.

## Editorial

Welcome to the Volume III No. II of the College Bulletin which highlights the events, activities and academic achievements of the members of the institution. This Bulletin is published twice a year and this issue provides a snapshot of records from July 2017 to December 2017.

To prepare excellent human resources and to create the best citizen, focus has been given to widen the mental horizons by imparting quality education. So teachers try to extend their knowledge and expertise through programmes and activities aimed at improving academic standards and achieving academic excellence. This Bulletin is a reflection of all these individual and collaborative efforts and their positive outcome. It is the offshoot of the enthusiastic co-operation of the DHSK College family.

The Editorial Board is thankful to the Principal, all teaching and non-teaching staff and students for their constant support and Kaustuv Prakashan and Printers for printing the Bulletin. Constructive suggestions are invited for the upgradation of the upcoming issues and any unintended errors in this issue is regretted.

On behalf of the Editorial Board.
